

SAP Business One Cloud® for Industry Solutions

**Get the business
software you need,
tailored for your
industry**

Power business growth affordably

To make informed, confident management decisions, you need visibility into and control over your business – financials, sales, inventory, and more. With the SAP Business One® Cloud for industry solutions, you get all the capabilities of the SAP Business One Cloud solution tailored to meet the needs of your industry

SAP Business One Cloud provides simple and affordable business management solution in one box, with the ease of software-as-a-service delivery. SAP Business One Cloud for industry solutions takes you one step further with a range of comprehensive solutions designed to fit your industry or micro-industry.

For a simple subscription fee that covers software, service, and support, you can access the full functionality of SAP Business One Cloud for industry, hosted by SAP.

Comprehensive, cloud-based functionality

SAP Business One Cloud for industry delivers everything you need to manage your most critical business functions. It enables you to standardize and streamline processes, minimize errors and delays, and take confident, decisive action.

It covers functional areas including:

- **Financial management**
- **Sales and customer management**
- **Purchasing and inventory control**
- **Production planning**
- **Business intelligence**
- **Analytics and reporting**

SAP Business One Cloud for industry solution is built with flexibility in mind so that, as your needs evolve, you can adapt and extend the solution, add new functionality, link to your existing e-commerce solutions and stay compliant with industry standards.

We can help you design the industry-specific solution you need to react quickly to new market opportunities and make decisions faster, giving you a competitive edge and keeping your customers satisfied.

Manufacturing

- **Solving your most pressing production challenges** – In a growing Manufacturing company, you need to ensure that you have the capacity to deliver the goods in full and on time. You're continually challenged to answer critical questions, such as whether you have the necessary materials, equipment and labor available, or what work is delayed or has to be completed this week? You need accurate, real-time visibility into every aspect of your manufacturing operations, and solve your most frustrating production challenges.
- **SAP Business One Cloud: a complete and customizable solution** – SAP Business One Cloud offers an affordable way to manage your entire business – from accounting and financials, purchasing, inventory, sales, customer relationships, and project management, to operations and human resources. SAP Business One Cloud helps you to streamline processes and gain greater insight into your business, so you can act fast and make decisions based on real-time information, to help you drive profitable growth.
- **Grow your business with industry-specific capabilities** – SAP Business One Cloud for Manufacturing gives you the transparency to help you manage production more efficiently. It gives you the dedicated tools to easily create and schedule manufacturing orders, simulate the planning and dispatch of orders, monitor work in progress, and adapt orders to changing conditions. You can identify potential materials shortages before they negatively impact production, and make better decisions with cost-based evaluations of production orders and projects. With SAP Business One Cloud for Manufacturing, you can gain greater control over your operations, reduce planning cycle times, decisively answer business-critical questions, and improve supply-readiness, productivity and profitability.
